

## PLUMBING

### Introduction:

A plumber is someone who installs or repairs piping systems, plumbing fixtures and equipment such as water heaters.

The plumbing industry is a basic and substantial part of every developed economy due to the need for clean water and proper collection and transport of wastes. In addition to the straight pipe or tubing, many fittings are required in plumbing systems such as valves, elbows, tees and unions.

### Plumbing tools:

1. Pipe wrench
2. Pipe vice
3. Die set
4. Hack saw.

#### 1. Pipe wrench:

The pipe wrench is an adjustable wrench used for turning soft iron pipes and fittings with a rounded surface. The design of the adjustable jaw allows it to rock in the frame such that any forward pressure on the handle tends to pull the jaws tighter together.
