### Test Description

Microsoft Excel 2010 is a popular spreadsheet application. It is included in the Microsoft Office Package, which also includes Word and PowerPoint. The Microsoft Excel 2010 - Office Test measures both the Normal and Power User Test.

The Microsoft Excel 2010 - Normal User Test is designed to test essential test users of Excel who are required to edit, modify, and create Excel Worksheets. This test assesses the user's ability to create and develop a new Excel spreadsheet, including the most commonly used commands for formatting cells, navigation through the application, using formulas, and changing the visual appearance of the spreadsheet.

The Microsoft Excel 2010 - Power User Test attempts to provide the basis for separating candidates who possess slight exposure to Microsoft Excel 2010 from those who are conversant with the full functionality of the software. The primary topics include advanced formatting and formula editing. This test is designed to test candidates who will be required to use some of the more advanced features of the program on a regular basis.

Help for Microsoft Word and Microsoft Outlook are also available.
