The memo will include a background of the document and an analysis of the document's audience, purpose, layout, and presentation.

Background

The document is a six page article published by The American Institute of Chemical Engineers. The document was written by Robert W. Bly who is part of The Center for Technical Communication. In the article he discusses twelve common problems that technical writers face. He also talks about different ways to overcome these mistakes. There are eight tables throughout the document that serve as examples of the topics being discussed.

Analysis

The document has a very specific audience, people who will be doing technical writing. There is little chance that anyone other than a technical writer would have a desire to read this document. The title of the document itself shows that the article is written for technical writers. The reader would not be reading an article on avoiding technical writing mistakes if they were not a technical writer. During topic two of the article the author also directly addresses the audience as people who will be doing technical writing "With most technical documents — articles, papers, manuals, reports, brochures — you are writing for many readers, not an individual." (Robert W. Bly). All of this combined shows that the document is clearly written for technical writers.

The purpose of this document is to help technical writers improve their writing. The author starts the article by explaining why technical writers need to improve their writing. This leads us to believe the article will help technical writers improve their writing. "The average engineer in industry cannot write clear, lucid prose." (Robert W. Bly). He also states he will be explaining how to fix common problems technical writers face. "This article discusses the 12 most common problems in technical writing and provides tips on how to recognize them and how to solve them." (Robert W. Bly). The author makes sure the audience knows what they will be learning from reading this document.

Robert W. Bly presents this article in a very organized manner. He starts by giving a brief introduction and then listing twelve different problems technical writers face. The organization and presentation of this article makes the article simple to read and easy to understand. The article itself is even a demonstration of one way to organize a document. "List.
