*Inspiring Primary Learners* Roger McDonald, Poppy Gibson, 2021-02-25 *Inspiring Primary Learners* offers trainee and qualified teachers high quality case studies of outstanding practice in contemporary classrooms across the country. Expert authors unravel and reveal the theory and evidence that underpins lessons helping you make connections with your own practice and understand what excellent looks like within each context and how it is achieved. Illustrated throughout with interviews, photos and examples of children's work, it covers a range of primary subjects and key topics including creating displays, outdoor learning and developing a reading for pleasure culture. The voice of the practitioner is evident throughout as teachers share their own experience, difficulties and solutions to ensure that children are inspired by their learning. Written in two parts, the first exemplifies examples of practice for each National Curriculum subject whilst the second focuses on the wider curriculum and explores issues pertinent to the primary classroom, highlighting important discussions on topics such as Reading for pleasure, Writing for pleasure, Creating a dynamic and responsive curriculum, Creating inspiring displays, Outdoor learning, Pedagogy for imagination, Relationships and Sex Education. This key text shows how even within the contested space of education practitioners can inspire their primary learners through teaching with passion and purpose for the empowerment of the children in their class. For all new teachers, it provides advice and ideas for effective and engaging learning experiences across the curriculum.

Klinger,2026-01-22 This book provides a critical review of the long term effectiveness of education and social protection policies enacted by G10 countries in response to the global pandemic The COVID 19 pandemic caused the most significant disruption to education systems since the devastation of World War II Successive waves and variants of the coronavirus resulted in school closures and spurred a range of policy interventions across national education systems to combat both the cognitive i e achievement in reading mathematics and science and non cognitive socioemotional development mental and physical health impacts on student achievement and wellbeing This book aims to evaluate the long term efficacy of such interventions drawing on an

analysis of a cross section of nine industrialized countries the United Kingdom France Germany Italy Sweden Netherlands Belgium Canada and Japan It further offers cross national insights for policymakers and discusses the critical importance of broader notions of academic resilience in a post pandemic world Ultimately this volume aims to identify national policies that have helped to buffer students from the long term challenges associated with the aftermath of the pandemic A timely and important text it will be of interest to researchers and policymakers in education policy pandemic response impact evaluation and student mental health

**Pupil Assessment** ,2013 [Connecting Abstract Algebra to Secondary Mathematics, for Secondary Mathematics Teachers](#) Nicholas H. Wasserman,2018-12-12 Secondary mathematics teachers are frequently required to take a large number of mathematics courses including advanced mathematics courses such as abstract algebra as part of their initial teacher preparation program and or their continuing professional development The content areas of advanced and secondary mathematics are closely connected Yet despite this connection many secondary teachers insist that such advanced mathematics is unrelated to their future professional work in the classroom This edited volume elaborates on some of the connections between abstract algebra and secondary mathematics including why and in what ways they may be important for secondary teachers Notably the volume disseminates research findings about how secondary teachers engage with and make sense of abstract algebra ideas both in general and in relation to their own teaching as well as offers itself as a place to share practical ideas and resources for secondary mathematics teacher preparation and professional development Contributors to the book are scholars who have both experience in the mathematical preparation of secondary teachers especially in relation to abstract algebra as well as those who have engaged in related educational research The volume addresses some of the persistent issues in secondary mathematics teacher education in connection to advanced mathematics courses as well as situates and conceptualizes different ways in which abstract algebra might be influential for teachers of algebra
