The kettle was poured into _____ when the _____ added to the _____

MATTER

All substances in the universe are made up of matter. Not all matter is made up of tiny little things called particles.

How particles behave differently depending on what state they are in.

There are three different states of matter they are Solid, Liquid and Gas.

In a solid the particles pack closely together. They are packed into a tight little space. The particles can't move around.

| States of matter | The physical forms of a substance | Solid, liquid, gas, plasma |
|------------------|--|----------------------------|
| Solid | Particles are close together, and vibrate in place, strong attraction to each other | |
| Liquid | Particles are close together, but can slide past each other, move fast enough to overcome attraction | |
| Gas | Particles move independently and collide frequently, move very fast | |
| Plasma | Particles have broken apart | |
