

TABLE 2.16: Emerging Standards and Bulletins

Standard	Description
TSB-96	<i>Field Certification of Installed Category 5 Channels and Level III-E Test Equipment</i> Specifies additional performance categories for field testing of Category 5 and 5e cabling required to support Gigabit Ethernet (1000Base-T). It introduces new testing parameters such as ELFEXT, return loss, propagation delay, and delay skew. This bulletin will also specify tighter requirements for a new level of field test equipment (Level III-E).
TIA/EIA 526-14	<i>Optical Power Loss Measurements of Installed Multimode-Fiber Cable Plant</i> Specifies guidelines and procedures for measuring optical loss between two passively connected points of a multimode fiber-optic cabling plant. This document specifies light sources, test jumpers, calibration, accuracy, interpretation of results, and documentation.
TIA/EIA 526-7	<i>Measurement of Optical Power Loss of Installed Single-Mode-Fiber Cable Plant</i> Specifies guidelines and procedures for measuring optical loss between two passively connected points of a single-mode fiber-optic cabling plant.
Category 6	<i>Transmission Performance Specifications for Four-Pair 100-Ohm Category 6 Cabling</i> Specifies components such as cabling and connecting hardware and defines basic link and channel link for Category 6 channels and Level III field tester requirements. Ratification is expected later in 2001.
Category 7	<i>Transmission Performance Specifications for Four-Pair 100-Ohm Cabling at Bandwidth up to 600MHz</i> Work has just begun creating a specification for Category 7 cabling running at 600MHz. This specification will require different connecting hardware and a different cable design, probably STP. Interestingly, TIA is not directly involved in this specification but will probably adopt whatever specification the ISO comes up with. No realistic time frame can be established for ratification because so much work needs to be done on this cable specification.

If you want to keep up on the latest TIA/EIA specifications and the work of the various committees, visit the TIA Web site at www.tiaonline.org/standard/sfg and go to the TR-42 page.

ISO/IEC 11801

The International Organization Standards (ISO) and the International Electrotechnical Commission (IEC) publish the ISO/IEC 11801 Standard predominantly used in Europe. This Standard was released in 1995 and is similar in many ways
