Learning Apex Firus Hanov, 2026-01-20

Ready to learn Apex but don't know where to start. This book is designed for Salesforce administrators who aspire to become developers. If you've mastered clicks and workflows but hit a wall with what configuration can do, it's time to learn to code. I wrote this because every Apex resource I found assumed you already knew programming. That's frustrating. This book doesn't. What's Inside: You'll learn Apex step by step. Starting with basics: variables, data types, moving into queries and database operations, then triggers and automation patterns used by production teams. By the end, you'll understand how to write and test Apex code, SOQL queries and database operations, CRUD Triggers, and when to use them. How to handle errors without crashing. Real patterns that actually work in production. Who This Is For: Salesforce admins ready to learn coding. People switching to Salesforce development. Developers learning Apex from another language. Anyone studying for Salesforce certifications. People frustrated with Salesforce documentation. What You Get: Real code examples you can run. Exercises with solutions. No fluff. No unnecessary theory. I included common mistakes to avoid. Interview questions for each chapter and the production patterns I've seen work at real companies. This book assumes zero coding experience but doesn't waste time on stuff you don't need.

Salesforce.com Lightning Process Builder and Visual Workflow Jonathan Keel, 2016-11-25 Learn how to build logic into your apps by configuring Salesforce com Lightning Process Builder and Visual Workflow software tools to meet the needs of your organization without the use of code You will be able to build workflow diagrams on the Salesforce com platform and perform complex logic Individuals who have created workflow diagrams in other applications e g Microsoft Visio will feel very comfortable using these two tools from Salesforce If you find yourself in a situation where a standard Salesforce configuration does not meet your needs you can always rely on a

developer to extend the functionality through Visualforce and Apex code. What if you could take back that control and not rely on a developer or consultant? With two new technologies, Process Builder and Visual Workflow, introduced onto the Salesforce.com platform, you can accomplish much of what was normally handled with Apex code. Lightning Process Builder and Visual Workflow both allow for advanced logic that standard configuration such as Salesforce.com Workflow cannot do. Salesforce.com Lightning Process Builder and Visual Workflow details how these technologies can be used to create a call center application that guides operators through a call with screens that change based on the caller's responses. Automatically submit approvals to speed up and streamline your business. Update related records for any object being modified, including standard and custom objects.
