

# UNIT 1 – THINKING GEOGRAPHICALLY

**geography** = the study of where things are found on Earth's surface, why they're located there

## 1.1 – Introduction to Maps

### 5 Themes of Geography

| Theme                                | Definition                                   | Examples                                     |
|--------------------------------------|----------------------------------------------|----------------------------------------------|
| <b>Absolute Location</b>             | an exact coordinate                          | 10200 17th St. N. Phoenix, AZ, 85007         |
| <b>Relative Location</b>             | in relation with others                      | Next to the Starbucks in Olym                |
| <b>Place</b>                         | point on earth distinguished by a feature    | Florida                                      |
| <b>Region</b>                        | area defined by others or local and features | South East USA                               |
| <b>Movement</b>                      | shift in features and its impact on the area | Christianity from Europe → USA               |
| <b>Human-Environment Interaction</b> | relationship between both and their impact   | Floridians depend on oranges fields for food |

### Types of Maps

**Topographic maps** = show contour lines of elevation

- Reference maps** = show general information about places and show boundaries
- Thematic maps** = show density and distribution of quantitative data

**Topographic maps** = use colors and shading to represent quantitative data

excellent at showing density and its distribution

**Dot distribution maps** = uses dots with specific values at approximate locations

used to show distribution (cluster/spread?)

**Quantitative symbol maps** = uses symbols of different sizes to represent values

used to show quantitative data and differences but more subtle

**Isoline maps** = uses lines to connect points of equal value to depict variations in data

help recognize patterns of similarities between areas's geography and data

**Choropleth** = areas of uniform are proportional to data being measured

used to display the emphasis of how present a feature is

**Flow line maps** = express directions of geographic movement

display migration patterns well
