Innovation in Economics and Business VI Tor A. Johannessen, Ansgar Pedersen, Kurt Petersen, 2013-04-17 Business education and business research has often been criticized by the business community which claims that much of it is mainly directed at the establishment of teachers and researchers themselves instead of distributing their knowledge to the business community It may seem that many universities and other research institutions have turned into mere knowledge manufacturers where the emphasis is more on the output volume than on quality of relevance with little or no consideration for the end users As universities and corporations attempt to prepare management to be alert to future changes improved and even brand new teaching methodologies are required The main focus of the present volume is on the distribution and selection of new knowledge How can business educators deliver new knowledge to students and the business community more rapidly than before How should we define the core business curriculum when new knowledge becomes old knowledge

The Teaching of Design and Innovation Gabriel J. Costello, 2020-05-06 This book is about design and innovation what it is and how to teach it The blending of design and innovation is having an increasing impact not only on the world of products and services but on a wide variety of disciplines such as information and communications technology ICT business education and medicine However there is a lack of books on teaching the subject despite the significant growth of interest in

both academia and the workplace This book addresses this gap by outlining foundational principles for the teaching of design and innovation and by offering a practical process for implementing the pedagogy in academic institutions and outside academia in the context of continuing professional development CPD It describes two undergraduate case studies that aimed to instill design and innovation competences in students of both engineering and business disciplines The cases involved student teams working with incubation centre start ups and multi national subsidiaries One of the aims of this book is to provide a resource for continuing professional development CPD Consequently a third practitioner based case study is presented as an example of research informed teaching In addition the book proposes the concept of Simulation Action Learning SAL as an enhancement of Project Based Learning PBL
