Police/detectives

A police officer/detective will be the first to respond to a 999 call, and their role when they arrive at the scene is to assist in the investigation, and cordon off the crime scene from the public, if it is outside, and deal with any other issues that are present, such as calling an ambulance if someone is injured. They also collect evidence to send to the CPS to see whether the case would go to court.

A strength of the police is that they are **available** 365 days a year to respond very quickly when a crime has been committed and can cut off the crime scene so that it isn't disturbed because of their authority over the public. They can also arrest possible suspects **because of their expertise** in having the power to arrest people and are required to be educated in policing so that they do not use their powers incorrectly. The police are also a public service, meaning **the cost is low**. The case of Rhys Jones is an example as the police and detectives used phone tapping in order to prove Sean Meador guilty of shooting the boy, which led to him getting charged with the murder and providing justice for Rhys' family.

Limitations of the police are that they **may not always be available**, or be held up by other cases when you call 999. They can withhold evidence that may be crucial to a trial, they can have prejudiced ideas and arrest an innocent person instead of the real suspect, and can cause conflict at a scene, all of which **demonstrate lack of expertise** because of their powers being used incorrectly. An example of this is Colin Stagg, who was 'honeypotted' by police and coerced into confessing to the murder of a woman and her child even when he was innocent, which had a long term impact on his life and reputation because of the accusations made. Detectives also deal with very emotionally intense cases, such as murder and sexual abuse, which can damage their mental health in the long-term.

Crime Scene Investigators

Crime scene investigators (or Scene of the Crime Officers (SOCOs)) collect evidence from a crime scene and from bodies to preserve it to be used in a possible trial so it does not get contaminated. If it is contaminated it cannot be used in court. They take pictures of evidence, package evidence, and overall control the crime scene once they arrive.

Strengths of crime scene investigators is that they benefit from the work of forensic experts (DNA) and that **they have expertise** as are trained to have a deep understanding of crime scenes and how they can look or work, which decreases the risk of a false conviction and can provide evidence in court. They are **available 24/7** to investigate so there is no waiting period if a crime was to take place at night, which is a benefit as evidence can then be processed quicker and there is less of a risk that evidence may become contaminated. A case study demonstrating strengths is that of Mike O'Leary, whose flesh was found promptly at the farm where he was attacked, which allowed the CSI to trace him back to his killer best friend.

A weakness, however, is that parts of a crime scene can be contaminated by external factors (such as weather) which can make their findings inaccurate (or mis-conducted). It is also a long, **expensive process** costing £250 per test that does not guarantee a conviction at the end of it, and errors can be made by either purposeful or accidental malpractice, which can lead to inaccurate testimonies or a false conviction. A case study representing this is that of Stephen Lawrence as SOCOs failed to follow up on evidence because of institutional racism covering up the fact that it was a racially motivated attack, which meant a conviction wasn't made for his murder for 20 years.
